# UPDATES AND LANGUAGE AVAILABILITY

---

## UK/US

The latest drivers and documentation updates for this product are available on Internet.

Log on to: [www.scanning.datalogic.com](http://www.scanning.datalogic.com)

## I

Su Internet sono disponibili le versioni aggiornate di driver e documentazione di questo prodotto. Questo manuale è disponibile anche nella versione italiana.

Collegarsi a: [www.scanning.datalogic.com](http://www.scanning.datalogic.com)

## F

Les versions mises à jour de drivers et documentation de ce produit sont disponibles sur Internet. Ce manuel est aussi disponible en version française.

Cliquez sur: [www.scanning.datalogic.com](http://www.scanning.datalogic.com)

## D

Im Internet finden Sie die aktuellsten Versionen der Treiber und Dokumentation von diesem Produkt. Die deutschsprachige Version dieses Handbuchs ist auch verfügbar.

Adresse : [www.scanning.datalogic.com](http://www.scanning.datalogic.com)

## E

En Internet están disponibles las versiones actualizadas de los drivers y documentación de este producto. También está disponible la versión en español de este manual.

Dirección Internet: [www.scanning.datalogic.com](http://www.scanning.datalogic.com)

## USING QUICKSCAN® MOBILE READER AND CRADLE

The QuickScan® Mobile reader and cradle build a Cordless Reading System for the collection, decoding and transmission of barcoded data.

Standard models can be connected to a Host PC through a USB, RS-232, Wedge or Pen emulation cable. All models are suited for single-cradle layouts.

The LEDs signal the QuickScan® Mobile cradle status, as described in the following table:

	LED	BEEPER	STATUS
	Power on / Data	-	Yellow On = QuickScan® Mobile cradle is powered. Yellow Blinking = the cradle receives data and commands from the Host or the reader.
	Charging	-	Red On = the battery charge is in progress.
	Charge completed	-	Green On = the battery is completely charged.
	Alternating red/green	Repetitive beep	Charging out of temperature range, over-current or over-voltage conditions

## READING ANGLE

QuickScan® Mobile readers automatically scan barcodes **at a distance**. Simply aim and pull the trigger. Code scanning is performed along the center of the light bar emitted from the reading window. This bar must cover the entire code.

Successful scanning is obtained by tilting the reader with respect to the barcode to avoid direct reflections, which could impair the reading performance. See the figures below.

Successful reading is obtained by an audible tone.

Good read LED

OK

Not Advised

## HANDS-FREE USE

When using the QuickScan® Mobile on the cradle, remember to lock the reader by pushing up the locking system as indicated in the following figure.

## USING YOUR QUICKSCAN® MOBILE READING SYSTEM

Follow the procedure below to start using your QuickScan® Mobile reading system:

1. Connect a QuickScan® Mobile cradle to the Host. For installation and connection information see page 5.
2. Insert the QuickScan® Mobile reader into the cradle to start the battery charging.  
A full charge of the Lithium battery takes 3.5 – 6 hours.

*To achieve the best battery life, it is recommended to perform a full battery charge before using the reader **in hand-held mode**.*

### NOTE

In hands-free use, you can immediately start using the *reader*, since it is powered by the cradle.

3. Configure the QuickScan® Mobile reader.
4. Configure the QuickScan® Mobile cradle. See QuickScan® Mobile cradle configuration on page 7.

## CHANGING THE BATTERIES

To change the battery of your reader, you must:

1. Unscrew the battery cover screw (Figure 1)
2. Unplug the white connector and remove the old battery (Figure 2)
3. Insert the new battery and plug in the white connector

*When inserting the new battery into the handle pay attention to position the battery and the connector just as shown in Figure 3.*

### NOTE

Figure 1

Figure 2

Figure 3

4. Insert the cover in the handle and screw it back into place.

Figure 4

**WARNING**

*Do not incinerate, disassemble, short terminals or expose to high temperature. Risk of fire, explosion. Use specified charger only. Risk of explosion if the battery is replaced by an incorrect type. Dispose of the batteries as required by the relevant laws in force.*

## SYSTEM CONNECTIONS

**CAUTION**

*Connections should always be made with power off!*

You can connect the QuickScan® Mobile cradle to the Host through the dedicated connector, using the cable corresponding to the desired interface type.

1. Connect the appropriate interface cable to the cradle by simply plugging it into the Host connector on the base of the cradle.

**QuickScan® Mobile Cradle - Bottom View**

To disconnect the cable, insert a paper clip or other similar object into the hole corresponding to the connector on the base of the cradle. Push down on the clip while unplugging the cable. Refer to the following figure:

**Disconnecting the Cable**

### RS-232

### USB

**IBM USB POS**

**WEDGE**

**WEDGE**

**PEN**

## QUICKSCAN® MOBILE CRADLE CONFIGURATION

The QuickScan® Mobile cradle configuration can be performed in two ways: either by sending configuration strings from the Host via the RS-232 or USB-COM interface or by reading configuration barcodes with the reader.

### Serial/USB-COM Configuration

By connecting the QuickScan® Mobile cradle to a PC through an RS-232 or USB cable (only USB-COM interface) it is possible to send configuration strings from the PC to the reader. Using this method you can also send new configuration strings from the PC to the reader or upgrade application software onto the reader.

## QUICKSCAN® MOBILE READER CONFIGURATION

When the QuickScan® Mobile cradle is connected and powered, configure the QuickScan® Mobile reader by reading the following codes in the given sequence and follow the instructions.

**Note:** for the numeric code selection of step 3, use the table at the end of this Quick Reference Guide.

1. Restore QuickScan® Mobile default  

2. Enter configuration  

3. Set Radio Address  
  
 +

four digits for the QuickScan® Mobile Address  
 (from 0000 to 1999).

**All readers used in the same area must have different addresses.**

4. Exit and Save configuration  

5. Read the **Bind** code to pair the QuickScan<sup>®</sup> Mobile reader to the cradle. The reader is dedicated to the cradle. Any previously **bound** reader will be excluded.

The green LED on the QuickScan<sup>®</sup> Mobile reader will blink: the reader is ready to be positioned onto the cradle.

6. Firmly position the reader onto the cradle within 10 seconds, a beep will be emitted, signaling that the QuickScan<sup>®</sup> Mobile cradle has been paired to the QuickScan<sup>®</sup> Mobile reader.

**YOUR READER IS NOW READY TO READ CODES.**

7. Now you can configure the QuickScan<sup>®</sup> Mobile cradle by reading configuration barcodes.

## **INTERFACE SELECTION**

---

Follow the procedure to configure the interface required by your application.

Multi-standard interface models:

- USB Interface
- RS-232 Interface
- Wedge Interface
- Pen Interface

## USB INTERFACE CONFIGURATION

The USB interface is compatible with:

- Windows 98 (and later)
- Mac SO 8.0 (and later)
- 4690 Operating System

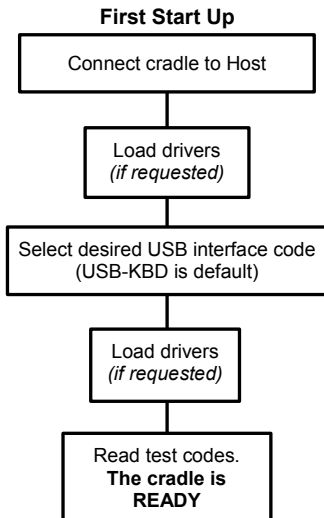

### START-UP

As with all USB devices, upon connection, the Host performs several checks by communicating with the cradle. Before the cradle is ready, the correct USB driver must be loaded.

For all systems, the correct USB driver for the default USB-KBD interface is included in the Host Operating System and will either be loaded automatically or will be suggested by the O.S. and should therefore be selected from the dialog box (the first time only).

You can now read codes with the associated QuickScan® Mobile reader. At this point you can read the USB interface configuration code according to your application. Load drivers from the O.S. (if requested). When configuring the USB-COM interface, the relevant files and drivers must be installed from the USB Device Installation software which can be downloaded from the web site: <http://www.scanning.datalogic.com>.

The cradle is ready.

Successive start-ups will automatically recognize the previously loaded drivers.

## USB INTERFACE SELECTION

---

USB-KBD (default)

USB-KBD-ALT-MODE

USB-KBD-APPLE

USB-COM\*

USB-IBM-Table Top

USB-IBM-Hand Held

\* When configuring USB-COM, the relevant files and drivers must be installed from the USB Device Installation software, which can be downloaded from the web site <http://www.scanning.datalogic.com>.

Select one keyboard nationality code from the table at page 15.

## RS-232 INTERFACE SELECTION

Read the QuickScan® Mobile cradle restore default code, and then read the interface selection code for your application:

### RESTORE QUICKSCAN® MOBILE CRADLE DEFAULT

### RS-232 INTERFACE

Standard

### POS TERMINALS

Nixdorf Mode A

Fujitsu

ICL Mode

## WEDGE INTERFACE SELECTION

---

**Read** the QuickScan® Mobile cradle restore default code, then read the interface selection code for your application:

### RESTORE QUICKSCAN® MOBILE CRADLE DEFAULT

### WEDGE INTERFACE

IBM AT or PS/2 PCs

IBM XT

PC Notebook

IBM SURE1

IBM Terminal 3153

**WEDGE INTERFACE (CONTINUED)**

IBM Terminals 31xx, 32xx, 34xx, 37xx:

To select the interface for these IBM Terminals, read the correct KEY TRANSMISSION code. Select the KEYBOARD TYPE if necessary (default = advanced keyboard).

**KEY TRANSMISSION MODE**

make-only keyboard

make-break keyboard

**KEYBOARD TYPE**

advanced keyboard

typewriter keyboard

**ALT MODE**

The following interface selection allows barcodes sent to the PC to be interpreted correctly independently from the Keyboard Nationality used. **You do not need to make a Keyboard Nationality selection.**

(default = Num Lock Unchanged)

**Make sure the Num Lock key on your keyboard is ON.**

IBM AT - ALT mode

PC Notebook - ALT mode

**WEDGE INTERFACE (CONTINUED)**

**WYSE TERMINALS**

ANSI Keyboard

PC Keyboard

ASCII Keyboard

VT220 style Keyboard

---

**DIGITAL TERMINALS**

VT2xx/VT3xx/VT4xx

---

**APPLE**

APPLE ADB Bus

## USB / WEDGE KEYBOARD NATIONALITY

---

USB/Wedge interface users should select one of the following KEYBOARD NATIONALITY codes.

Belge

Deutsch

English (UK)

Español

Français

Italiano

Svenskt

USA

The following Keyboard Nationality selection is only valid for IBM AT compatible PCs:

Japanese

## **PEN INTERFACE SELECTION**

---

**Read** the QuickScan® Mobile cradle restore default code, then read the interface selection code for your application:

**RESTORE QUICKSCAN® MOBILE CRADLE DEFAULT**

**PEN INTERFACE**

## OPERATING TEST

---

Read the TEST codes below.

EAN-8

EAN-13

Code 39 (Normal)

Code 128

Interleaved 2 of 5

**YOUR SYSTEM IS READY TO READ CODES AND TO SEND THE DATA TO THE HOST.**

To change the defaults, refer to the "QuickScan® Mobile Reference Manual", part number 820001970, or to the Datalogic Aladdin™ Configuration program, both downloadable from the website.

## READER DEFAULT CONFIGURATION

---

### DATA FORMAT

code identifier disabled (enabled for POS terminals), field adjustment disabled, code length tx not transmitted, character replacement disabled, address stamping disabled; address delimiter disabled

### POWER SAVE

sleep state/USB suspend disabled, enter sleep timeout = 0.6 sec

### READING PARAMETERS

hand-held operation = hardware trigger, stand operation = automatic, trigger active level, no timeout, Flash On = 1 sec, Flash Off = 0.6 sec, one read per cycle, safety time 0.5 sec, beeper intensity high, tone 2, beeper type monotone, beeper length short, good read spot duration medium, automatic operation aiming light enabled

### DECODING PARAMETERS

ink spread enabled, overflow control enabled, interdigit control enabled, Puzzle Solver™ disabled, decoding safety = one read

### CODE SELECTION

#### Enabled codes

- EAN 8/EAN 13 / UPC A/UPC E without ADD ON  
check digit transmitted, no conversions
- Interleaved 2/5  
check digit control and transmission, variable length code; 4-99 characters
- Standard Code 39  
no check digit control, variable length code; 1-99 characters
- Code 128  
variable length code; 1-99 characters
- EAN 128, ISBT128, Code 93, Codabar, pharmaceutical codes, MSI, Plessey, Telepen, Delta IBM, Code 11, Code 16K, Code 49, GS1 DataBar™ (GS1 DataBar™ includes the following symbologies: RSS-14, RSS-14 Stacked, RSS Expanded and RSS Limited).

### ADVANCED FORMATTING PARAMETERS

concatenation disabled, no advanced formats defined

### RADIO PARAMETERS

radio protocol timeout = 2 seconds, power-off timeout = 4 hours, single store disabled, beeper control for radio response = normal

---

## CRADLE DEFAULT CONFIGURATION

---

### USB DEFAULT SETTINGS

DATA FORMAT: code identifier disabled, code length not transmitted, character replacement disabled, address stamping disabled, address delimiter disabled.

USB KEYBOARD: USA keyboard, FIFO enabled, inter-character and inter-code delays disabled.

USB COM: handshaking disabled, delay disabled, rx timeout 5 sec., ack/nack disabled, FIFO enabled, serial trigger lock disabled.

Default Headers and Terminators for each USB mode:

- USB-KBD: no header, terminator = ENTER
- USB-KBD-ALT-MODE: no header, terminator = CR
- USB-COM: no header, terminator = CR-LF
- USB-IBM-TABLE TOP: not applicable
- USB-IBM-HAND HELD: not applicable

### RS-232 Standard DEFAULT SETTINGS

9600 baud, no parity, 8 data bits, 1 stop bit, handshaking disabled, ACK/NACK disabled, FIFO enabled, inter-character delay disabled, 5 sec. rx timeout, serial trigger lock disabled.

DATA FORMAT: code identifier disabled, code length not transmitted, no header, terminator = CR-LF, character replacement disabled, address stamping disabled, address delimiter disabled.

### RS-232 Nixdorf DEFAULT SETTINGS

9600 baud, odd parity, 8 data bits, 1 stop bit, handshaking hardware (RTS/CTS), ACK/NACK disabled, FIFO disabled, inter-character delay disabled, 9.9 sec. rx timeout, serial trigger lock disabled.

DATA FORMAT: code identifier enabled, code length not transmitted, no header, terminator = CR, character replacement disabled, address stamping disabled, address delimiter disabled.

### RS-232 Fujitsu DEFAULT SETTINGS

9600 baud, no parity, 8 data bits, 1 stop bit, handshaking disabled, ACK/NACK disabled, FIFO enabled, inter-character delay disabled, 2 sec. rx timeout, serial trigger lock disabled.

DATA FORMAT: code identifier enabled, code length not transmitted, no header, terminator = CR, character replacement disabled, address stamping disabled, address delimiter disabled.

### RS-232 ICL DEFAULT SETTINGS

9600 baud, even parity, 8 data bits, 1 stop bit, handshaking RTS always on, ACK/NACK disabled, FIFO enabled, inter-character delay disabled, 9.9 sec. rx timeout, serial trigger lock disabled.

DATA FORMAT: code identifier enabled, code length not transmitted, no header, terminator = CR, character replacement disabled, address stamping disabled, address delimiter disabled.

**WEDGE DEFAULT SETTINGS**

USA keyboard, caps lock off, caps lock auto-recognition enabled; num lock unchanged, inter-character and inter-code delay disabled.

DATA FORMAT: code identifier disabled, code length not transmitted, no header, terminator = ENTER, character replacement disabled, address stamping disabled, address delimiter disabled.

**PEN DEFAULT SETTINGS**

Interpret operating mode, minimum output pulse 600 μs, conversion to Code 39, overflow medium, output level normal, idle level normal, inter-block delay disabled.

**TECHNICAL FEATURES**

---

**QuickScan® Mobile Reader and Cradle**

<b>Electrical Features - READER</b>	
Battery Type	1 Lithium battery 700 mAh
Time of recharge Lithium	max 6 hours with USB cable
Operating autonomy	typical 20000 reads
Indicators	LED, Beeper
Max scan rate	235 scans/sec
<b>Electrical Features - CRADLE</b>	
Supply voltage	5 VDC ± 5%
Power consumption	max. 4 W (charging)
LED Indicators	Battery charging <b>red</b> Charge completed <b>green</b> Power / Data <b>yellow</b>
<b>Optical Features</b>	
Sensor	CCD solid state (2088 pixels)
Illuminator	LED array
Wavelength	630 ~ 670 nm
Max. LED Output Power	0.33 mW
LED safety class	Class 1 EN 60825-1
Reading field	see reading diagram
Max. resolution	0.10 mm, 4 mils
PCS minimum	20% (Datalogic Test Chart)

<b>Environmental Features – READER</b>	
Working Temperature	0°to + 40 °C (32° to 104 °F)
Storage Temperature (without battery)	-20° to 70 °C (-4° to 158 °F)
Humidity	90% non condensing
Drop resistance	IEC 68-2-32 Test ED 1.5 m (4 ft 9 in)
Protection class	IP30
<b>Environmental Features - CRADLE</b>	
Working temperature	0° to 40 °C (32° to 104 °F)
Storage temperature	-20° to 70 °C (-4° to 158 °F)
Humidity	90 % non condensing
Protection class	IP30
<b>Mechanical Features – READER</b>	
Weight (without batteries)	about 189 g (6.66 oz)
Dimensions	171 x 90 x 68 mm (6.72 x 3.54 x 2.80 in)
Material	Cycoloy C 2800 with desmopan 3855
<b>Mechanical Features – CRADLE</b>	
Weight	181 gr (6.38 oz)
Dimensions	80 x 130 x 90 mm (3.15 x 5.11 x 3.54 in)
Material	Cycoloy C 2800 with desmopan 3855

### QuickScan® Mobile Radio Features

<b>Radio Features</b>	<b>European Models</b>	<b>USA Models</b>
Radio Frequency	433.92 MHz	910 MHz
Bit rate	19200 baud	36800 baud
Effective Radiated Power	<10 mW	<1 mW
Range (in open air)	12 m	12 m
RF Modulation	FSK	

## WARRANTY

---

Datalogic warranties this product against defects in workmanship and materials, for a period of 36 months from the date of shipment, provided that the product is operated under normal and proper conditions.

Datalogic has the faculty to repair or replace the product; these provisions do not prolong the original warranty term. The warranty does not apply to any product that has been subject to misuse, accidental damage, unauthorized repair or tampering.

## PATENTS

---

This product is licensed under the U.S. Patent 6,158,661

This product is covered by one or more of the following patents:

U.S. patents 5,992,740; 6,305,606 B1; 6,517,003 B2; 6,631,846 B2; 6,712,271 B2; 6,817,525 B2; 6,834,806 B2; and 6,871,785 B2

European patents 789,315 B1; 851,378 B1; 895,175 B1; 962,880 B1; 1,164,536 B1; 1,205,871 B1; and 1,205,873 B1

Additional patents pending.

## SERVICES AND SUPPORT

---

Datalogic provides several services as well as technical support through its website. Log on to [www.scanning.datalogic.com](http://www.scanning.datalogic.com) and click on the [links](#) indicated for further information including:

- **PRODUCTS**

Search through the links to arrive at your product page where you can download specific **Manuals** and **Software & Utilities** including:

- **Datalogic Aladdin™** a multi-platform utility program that allows device configuration using a PC. It provides RS-232 interface configuration as well as configuration barcode printing.

- **SERVICE & SUPPORT**

- **Technical Support** - Product documentation and programming guides and Technical Support Department in the world

- **Service Programs** - Warranty Extensions and Maintenance Agreements

- **Repair Services** - Flat Rate Repairs and Return Material Authorization (RMA) Repairs.

- **Downloads** – Manuals & Documentation, Data Sheets, Product Catalogues, etc.

## COMPLIANCE

---

**This device must be opened by qualified personnel only.  
The batteries must be removed before opening the device.**

## POWER SUPPLY

This device is intended to be supplied by a UL Listed/CSA Certified Power Unit marked "Class 2" or LPS power source rated 5 V, minimum 0.8 A and having a cable length <3 m.

## FCC COMPLIANCE

Modifications or changes to this equipment without the expressed written approval of Datalogic could void the authority to use the equipment.

This device complies with PART 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference which may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## LED CLASS

**QuickScan® Mobile Product Label**

Class 1 LED product.

## RADIO COMPLIANCE

Contact the competent authority responsible for the management of radio frequency devices of your country to verify the eventual necessity of a user license.

Refer to the web site <http://europa.eu.int/comm/enterprise/rte/spectr.htm> for further information.

## WEEE COMPLIANCE
