

Download tools

<ftp://csuser:navigator@ftp.firich.com.tw/alex/AT1450/DmiEditWin64.rar>

1. Command Prompt(Run Administrator)

2. Enter the file path (I put the tools on the desktop)

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.14393]
(c) 2016 Microsoft Corporation. All rights reserved.

C:\Users\Administrator>cd Desktop/
C:\Users\Administrator\Desktop>cd DmiEditWin64
C:\Users\Administrator\Desktop\DmiEditWin64>_
```

3. UUID Read and write

RUUID.bat is Read file , **WUUID.bat** is Write file

Administrator: Command Prompt - RUUID.bat

```
C:\Users\Administrator\Desktop\DmiEditWin64>RUUID.bat First read the
C:\Users\Administrator\Desktop\DmiEditWin64>AMIDEWINx64 /SU machine UUID
+-----+
|          AMIDEWINx64 Utility (Aptio)   v5.17          |
|          Copyright (C)2015 American Megatrends Inc. All Rights Reserved.          |
+-----+

Initializing the SMBIOS interface. Please wait a moment.....
      Name          R/W  Status  Information
+-----+
(/SU)System UUID      R    Done   "0E84F7638418E7119E1F865653074556h" Machine UUID

C:\Users\Administrator\Desktop\DmiEditWin64>pause
Press any key to continue . . .

C:\Users\Administrator\Desktop\DmiEditWin64>WUUID.bat AUTO Write a new UUID You can use
C:\Users\Administrator\Desktop\DmiEditWin64>AMIDEWINx64 /SU AUTO WUUID.bat AUTO or WUUID.bat
+-----+
|          AMIDEWINx64 Utility (Aptio)   v5.17          |
|          Copyright (C)2015 American Megatrends Inc. All Rights Reserved.          |
+-----+

Initializing the SMBIOS interface. Please wait a moment.....
      Name          R/W  Status  Information
+-----+
(/SU)System UUID      W    Done   "F668979C8418E711836298ECD7F06456" new UUID

C:\Users\Administrator\Desktop\DmiEditWin64>pause
Press any key to continue . . .

C:\Users\Administrator\Desktop\DmiEditWin64>RUUID.bat read again
C:\Users\Administrator\Desktop\DmiEditWin64>AMIDEWINx64 /SU
+-----+
|          AMIDEWINx64 Utility (Aptio)   v5.17          |
|          Copyright (C)2015 American Megatrends Inc. All Rights Reserved.          |
+-----+

Initializing the SMBIOS interface. Please wait a moment.....
      Name          R/W  Status  Information
+-----+
(/SU)System UUID      R    Done   "F668979C8418E711836298ECD7F06456h" UUID write is complete
```

4. SN Read and write

RSN.bat is Read file , **WSN.bat** is Write file

```
Administrator: Command Prompt - RSN.bat
C:\Users\Administrator\Desktop\DmiEditWin64>RSN.bat
C:\Users\Administrator\Desktop\DmiEditWin64>AMIDEWINx64 /SS
-----+-----
|               AMIDEWINx64 Utility (Aptio)   v5.17               |
