

To use Lpksetup for language package installation

1. Install Windows.
2. Copy the language pack (lp.cab) to an accessible location in the installed Windows operating system.
3. Run **Lpksetup** the following ways:
 - At a command prompt, run **lpksetup**.
The **Install or Uninstall Display Languages** window appears. Follow the on-screen instructions to add a language pack.
4. Reboot
5. Change language settings in *control panel* and *settings* to deutsch
6. Log off, log on
7. The Menus are now in your language
