EPSON®

EXCEED YOUR VISION

Epson **TM-P60** *Series*

Wireless receipt and label printers
for retail and logistics

Getting your business moving is now even easier with our TM-P60 mobile thermal printer. Compact, lightweight and easy-to-use, it offers uninterrupted, high-speed, receipt and label printing on-the-go, so you can provide a fast, more efficient service anytime, anywhere.

Whether you need a receipt or label printer for retail, hospitality or in the warehouse, our wireless TM-P60 has all the features and functionality you need. From fast-food outlet to supermarket, leisure centre to warehouse, the TM-P60 brings flexibility and convenience.

Great features go mobile
Offering all the functionality of our world renowned TM-T88 printer, the fully-portable TM-P60 includes high-resolution graphics, barcodes and exclusive new fonts. It's perfect for producing sophisticated receipts, coupons, tokens and for on-demand labelling. With easy-to-use features such as drop-in paper load for hassle-free operation, partial auto-cutter to prevent paper jams, and ultra-fast thermal technology – we have brought speed and quiet printing to the wireless world.

Our wireless printer's compact, ruggedised and robust design means it can stand up to even the most challenging and harshest environments. And, with the TM-P60 series you have a choice of interfaces. For even more flexibility and convenience, both receipt and label models are available in WiFi, and the receipt version is also offered with Bluetooth.

Uninterrupted, high-performance printing
Unlike other wireless printers, the TM-P60 range – with an impressive 70 millimetres per second print speed – features a long-life 8 hour battery, easily recharged internally or by external charger. This means you can rely on uninterrupted, continuous performance by simply replacing batteries as necessary, rather than having to recharge the whole unit.

Unlimited applications

With the TM-P60 the possibilities are endless. Use it in conjunction with a PDA for queue-busting transactions and create extra checkouts during peak trading times or for promotions. Bring the point of sale to your customer for instant transactions while reducing their security and fraud concerns. And, to offer your customers greater freedom and independence, it can even be trolley mounted. The TM-P60 label printer, with its automatic peeling mechanism, is an ideal choice for shelf-edge labelling and mark-downs on demand.

The TM-P60 is also the key to greater efficiency in the warehouse. Hand-held or mounted on a belt, it enables you to print fast, clear data and barcodes in logistics and distribution environments, helping you to streamline your operation.

**Ready-to-go, secure and reliable**

Ensuring compatibility with your existing retail systems, TM-P60 series comes complete with OPoS, JPoS, ESC/POS and Windows drivers. Plus, we've also added industry standard wireless security protocols so you can be confident of secure wireless data communications. Quite simply, the TM-P60 offers flexible, high-speed printing, labelling, network support and extremely low cost of ownership with superior reliability.

For additional peace of mind, we offer CoverPlus, our advanced extended warranty service. Providing free access to technical support, as well as a repair and replacement facility, CoverPlus extends the one year back-to-base guarantee on all of our point of sale printers to give three years' protection. Low risk and low cost, CoverPlus enables your business to be fully operational at all times and helps you to avoid costly downtime.
