

Cash Cassettes and Cash Drawers

Date: 20.02.2008

Universal Cash Drawer (UCD)

The UCD (Universal Cash Drawer) was constructed using the latest production methods. It is robust, lightweight and offers large capacity at a minimum size.

The removable and folding coin insert simplifies the cash handling. Folding and locking the insert reduces to a minimum the time the contents are visible. In addition, transportation is simplified. When folded together, the dimensions of the insert also offer space advantages when being stored in the safe. The coin and note compartments are flexible and can be adapted for use with international currencies.

High security

The technical concept of the UCD makes it easier to remove the cash insert, which can be folded together. The operator can close and lock the cash insert and transport this box simply and securely. No additional cover plate is required. During transport the insert is locked and the contents are not visible to others. When folded together, the dimensions of the insert also offer space advantages when being stored in the safe.

Usable in all POS systems

The UCD fits to all POS systems.

The UCD contains an interchangeable release device on the back which ensures easy connection to various models. When there is a system change, only a new release needs to be installed rather than having to replace the whole drawer.

Lockable cash drawer

The cash drawer is opened electrically via a connection to the POS system or to the printer.

High-quality telescopic rails guarantee a long lifecycle in all market sectors, even those with heavy use. There is a quality lock on the front. A second security lock can be fitted as an option, which offers up to 2,000 lock combinations thus providing even more security.

Flexible interior

The inside of the cash drawer can be organised flexibly and thus adapted to the currency used. In the standard Euro configuration, there are four note and eight coin compartments. If desired, a fifth note compartment can be made from two coin compartments. The remaining six coin compartments can equally be increased to eight by adding two additional separators.

The UCD offers a wide media slot on the front. Cheques and receipts can be securely inserted without having to open the cash drawer.

Options

- Additional security lock on the front
- Coin counting insert (Inkiess)
- Coin cup set (weighable)

Technical data

- Dimensions
W: 385 mm, H: 95 mm, D: 435 mm
- Weight
4.75 kg
- Colours
Light grey: RAL 9002
Anthracite: RAL 7021

Benefits

- For use with all POS hardware
- Interchangeable release technology enables economical continued use with new POS hardware
- Removable and foldable cash insert, flexible arrangement of the coin and note compartments, receipt compartment accessible from the outside
- High degree of security as the operator can close and lock the cash insert and transport the box simply and securely
- Folded together, the dimensions of the cash insert save space when stored in the safe
- High-quality telescopic runners guarantee long lifecycles in all sectors even those with heavy use
- Quality lock as standard with the possibility of adding a second lock

Universal Cash Cassette (UCC)

Keeping cash secure and safe at the till is a business-critical procedure in the retail industry. With the UCC (Universal Cash Cassette), Torex Retail offers an innovative model with quality security and intelligent design features.

The UCC is built using compatible standard measurements. Its hardwearing metal casing contributes to security at the POS and can easily be released from the cash desk. The release mechanism which is integrated into the outer cassette is connected to the printer or till using a simple plug-in connector.

The variable plastic inner cassette with lockable lid improves the ergonomics at the cash desk and offers additional security during transportation. The UCC is a variable cash cassette that combines a large capacity with a space-saving design.

Separate base plate

The outer cassette can be screwed onto the cash desk or locked on the base plate where it was previously mounted. Using the base plate, allows for simple and safe removal of the outer cassette.

Integrated release mechanism with pluggable connection cables

The electric release mechanism is accommodated securely in the metal casing of the outer cassette. The connection to the printer or to the till terminal is by means of a simple plug-in connection.

Lockable inner cassette

The inner cassette has an integrated lid which makes a separate cover a thing of the past. For alternating cashiers, all that's needed are economical additional inner cassettes. The lid is lockable and offers additional security for transportation to the cash office. Retractable handles make it easier to insert and remove the inner cassette.

Flexible interior

Coin and note compartments, with a separate cheque/receipt compartment, can be arranged how you like on the left or right inside the inner cassette. This improves workplace ergonomics and ensures additional security at the cash desk.

Options

- Various versions of the lid for the outer cassette
- Coin cup set (weighable)
- External note holder
- Cable options

Technical data

- Dimensions outer cassette
W: 460mm, H: 100mm, D: 172mm
- Weights
Outer cassette: 2.95kg
Inner cassette: 1.23kg
Base: 0.66kg
- Colours outer cassette
Light grey: RAL 9002
Anthracite: RAL 7021
- Electrical data
12V, 24V, 36V with response switch
- Connection port on the outer cassette
5-pin, DIN port

Benefits

- Robust metal casing for additional security at the checkout
- Base plate allows fast removal of the cash cassette from the cash desk
- Removable inner cassette with lockable lid for additional security during transport and storage
- Retractable handles for easy and fast removing the inner cassette in case of cleaning and services
- Flexible coin and note compartments for ergonomic workplace design

Euro Cash Cassette

The Euro cash cassette can be used throughout the retail industry.

It offers a high degree of security in terms of storing money at the POS workplace. The Euro cash cassette can be connected to a large number of different POS systems. Connection is directly to the POS or to the POS printer.

The Euro cash cassette opens upwards, thus allowing the operator to sit nearer to the POS terminal and reach the contents easier. When the lid is open, outsiders cannot see inside the cash cassette.

The Euro cassette is easy to transport due to its size, light-weight and compact dimensions. When installing, the cash cassette locks securely into the base. Removal is by the touch of a button. The Euro cash cassette is made of extremely hardwearing and durable plastic.

The type of plastic and its construction guarantee a long lifecycle.

Fixed base plate

The Euro cash cassette system comprises a base and the Euro cash cassette. The base is fixed to the cash desk. The Euro cash cassette is placed onto the base and locked in. The electronic release mechanism is integrated to the base. To remove the Euro cash cassette from the base, all you need to do is simply open the cash cassette and press the release button. The cash cassette immediately disengages and can easily be removed.

Robust cash cassette

The Euro cash cassette is made of hardwearing and durable plastic. Its construction guarantees a long lifecycle. The plastic is environmentally friendly and easy to recycle.

Lockable cash cassette

The Euro cash cassette is always opened electronically by the POS system. The cash cassette has a quality lock which also allows opening the cash cassette manually with a key. The quality lock is offered with up to 50 locking combinations. A safety lock for the front can be provided as an option – this ensures additional safety.

A switch integrated into the base directly informs the POS system if the Euro cash cassette is open.

Coin, note and receipt compartments

There are eight coin compartments, six note compartments, one safety note compartment and one receipt compartment. At the front the Euro cash cassette has a media slot where receipts can be inserted securely and stored without it being necessary to open the cash cassette.

Options

- Additional security lock on the front
- Banknote holder
- Coin counting insert (Inkiess)

Technical data

- Dimensions
W: 482 mm, H: 100 mm, D: 175 mm
- Weights
Cash cassette: ca. 1.9 kg
Base: ca. 0.5 kg
- Colours
Light grey: RAL 9002
Anthracite: RAL 7021
- Connection cable
Length: up to 5 m

Benefits

- Simple and secure locking of the Euro cash cassette on the base, removable at the touch of the release button
- Long lifecycle due to solid construction and use of hardwearing and durable plastic
- Quality lock with up to 50 locking combinations, can be upgraded with
- a security lock
- Receipt compartment accessible from the outside allows cheques and receipts to be inserted without having to open the cash cassette

Standard Cash Cassette

The Standard cash cassette can be used throughout the retail industry. It offers a high degree of security in terms of storing money at the POS workplace. Its flexibility is achieved by variable note and coin compartments. The Standard cash cassette can be connected to a large number of different POS systems. Connection is directly to the POS or to the POS printer. The Standard cash cassette opens upwards thus allowing the operator to sit nearer to the POS terminal and reach the contents easier. When the lid is open, outsiders cannot see inside the cash cassette.

The Standard cash cassette is easy to transport due to its size, lightness and compact dimensions. When installing it, the cash cassette locks into the base. Removal is by the touch of a button. The Standard cash cassette is made of hardwearing and durable plastic. The used plastic and its construction guarantee a long lifecycle.

Fixed base plate

The Standard cash cassette system comprises a base and the Standard cash cassette. The base is fixed to the cash desk. The Standard cash cassette is placed on the base and locked in.

The base contains the release device. To remove the Standard cash cassette from the base, all you need to do is simply open the cash cassette and press the release button. The cash cassette immediately disengages and can easily be removed.

Robust plastic cash cassette

The Standard cash cassette is made of very hardwearing and durable plastic. Its construction guarantees a long lifecycle. The plastic is environmentally friendly and easy to recycle.

Lockable cash cassette

The Standard cash cassette is always opened electronically by the POS system. The cash cassette has a quality lock which allows the cash cassette to be opened manually with a key. The quality lock is offered with 50 locking combinations. A switch integrated into the base directly informs the POS system that the Standard cash cassette is open.

Coin and note compartments

There are eight removable coin compartments and four note compartments for banknotes, cheques and credit card receipts. A fifth note compartment can be added by removing two coin compartments. Additionally, two different types of notes can be stored in one note compartment by using a note separator.

Options

- Banknote holder
- Hand rest for the lid

Technical data

- Dimensions
W: 459 mm, H: 100 mm, D: 155 mm
- Weight
Cash cassette: ca. 1.7 kg
Base: ca. 1.4 kg
- Colours
Light grey: RAL 9002
Anthracite: RAL 7021
- Connection cable
Length: up to 5 m

Benefits

- Simple and secure locking of the Standard cash cassette to the base, removable at the touch of a button
- Long lifecycle life due to construction as well as hardwearing and durable plastic
- Quality lock with up to 50 locking combinations
- Flexibility for the Euro currency due to variable coin and note compartments
